

Dear Mr. Copps,

Congratulations on doing the interview with Bill Moyers.

In light of the Washington tendencies that appear to be surfacing, I hope you don't find yourself in a Leland Olds situation. That, of course, can't happen until 2005 so no worries yet. Right?

I believe that your point of view on the airwaves is the right one even though you currently seem to find yourself in the minority. Good luck with your work. I wish you every success and I believe that many of your fellow Americans are with you as they feel the impact of corporate concentration and its pressure on their daily lives.

It appears that your President would like to create a new period of aristocracy! Some of that tendency appears to be showing up in various publications that are finding their way across the border, notably Gates Sr. and Collins book - "Wealth and Our Commonwealth". I'm giving you the reference just in case you aren't aware of it and because from here it appears that they might constitute useful allies for you.

Hope you're having a great day and keep up the good and necessary work.

Regards,

Tore Badenduck

P.S. Tried to file this earlier on May 8, 2003, but obviously took the wrong pathway in the electronic jungle so it bounced back with further instructions. Hence the time lapse from the time you did the program.

P.P.S. Note no place for Canadian commentary so I chose CA for California as a proxy for Canada. Now I can send. Bye for now.
